Configuration of Lync IP Phone

Lync IP Phone Polycom CX600

You can ask service-desk@cern.ch for help to install the device

Info: <http://cern.ch/lync>

To ask questions: <http://cern.ch/lync-community>

Need help? E-mail: service-desk@cern.ch, tel: 77777

Register your phone on the network

Go to Resources portal <https://cern.ch/resources>

Click: Services ->Lync IP Phone service->Register Phone

The screenshot shows a web form titled "Lync IP Phone Service" with a sub-header "Lync IP enhanced telephony". The form is divided into sections: "Service Information", "Settings", and "Register Phone". Under "Register Phone", there are fields for "Model" (set to "HP 4120"), "MAC Address", "Office" (set to "31 R-017"), "Network Outlet" (set to "[Select an Outlet already connected]"), and "Or enter a free outlet ID:". A note below the MAC field states: "The MAC address can be found on the sticker located under the IP Phone device."

Note: If you have not subscribed to the Lync service follow the EDH Phone request form (link accessible on Resources portal)

Select your model and specify MAC address

Note: MAC address is written at the back of the phone

Select the network outlet you wish to connect the phone to.

Submit the request.

Once the registration has been completed you will receive a confirmation e-mail from the network team.

Connect your phone

Connect the cables

Connect the power and network to your phone

Lan: network cable from a network outlet

PC: network cable connected to your PC/MAC

Power: cable plugged into 24V socket

USB: cable plugged to a Windows PC (optional)

Handset: insert cable on left of phone

Wait for the "Welcome screen"

Start using the phone

Login to the phone system

If there is a user already logged on the phone then perform a factory reset (see Tips section)

1. Press the OK button on the Welcome screen and follow the steps on the screen

Note: If you have a Windows PC then confirm availability of a computer

- Skype for Business on Windows will ask you for your credentials

2. Specify the extension number (e.g 77112) and PIN that you have received in the activation e-mail of Lync Phone system

Configure the PIN to LOCK phone

3. Provide a new six digit code to protect your phone, you can use the PIN received in the activation e-mail.

Each phone is locked automatically after few minutes of inactivity to prevent other people to access personal information (Lync contacts, call logs etc.)

Configure the time zone

4. Select "GMT +01:00 Amsterdam, Berlin, Bern"

Configuration is finished!
